

Objectives

- Overview of Planning & Scheduling's Impact on Maintenance Work Management, Equipment Availability and Costs
- Review planning and scheduling fundamentals
- Review how YOU can positively impact the bottom line
- Review and understand your Process and Reliability Metrics

Process

- Participants play roles of maintenance supervisors and crafts, production supervisors and operators and stores personnel
- Participants experience working in an unplanned and unscheduled work environment is the 1st round
- Participants experience working in a planned and scheduled work environment in the 2nd round
- Discuss the differences, pros and cons

Benefits

- Create a better understanding of the Planning and Scheduling Process and how different groups interact to make it effective
- “Hands-On” role playing mirrors actual work environment issues and opportunities
- Highlights the cost and equipment availability benefits of a well coordinated and communicating work environment

- Discuss Importance of Metrics to Highlight Opportunities, Solve Problems & Provide Recognition

- Client Management Reinforces Seminar Message with Specific Plant/Corporate Objectives
